
Torrossa Digital Library reaches over 800 publishers from across Europe, UK and beyond, bringing its impressive global catalogue of scholarly e-content to more than 1.4 million digital texts.

Torrossa Digital Library continues to grow as a comprehensive and carefully curated resource for academic libraries, now offering access to a catalogue of more than 1.4 million digital texts, including over 760,000 e-books and 1,290 e-journals from more than 820 publishers.

With a strong focus on the Arts, Humanities and Social Sciences, Torrossa brings together high-quality scholarly content from across Europe and beyond, supporting teaching, research and discovery through a single, reliable platform. The breadth of the catalogue reflects ongoing collaboration with established academic publishers, university presses, research institutions and independent specialist publishers, helping libraries offer their communities access to an increasingly rich and diverse body of digital scholarship.

Recent additions from respected publishers and institutions including Franz Steiner, Cowley Publications, Government Institutes, New Amsterdam Books, Ediciones Cátedra and The British Academy, alongside the university presses of Pontificia Universidad Católica del Perú, Lehigh University, University of Chicago and University of Delaware further expand the range of material

available, introducing new titles and collections in key subject areas and strengthening coverage across languages, disciplines and publishing perspectives.

Access to content is enhanced by Torrossa Reader, based on Radium LCP technology, which offers secure and accessible reading solutions for academic users. Designed to facilitate consultation across desktop, mobile and web environments, Torrossa Reader helps institutions provide flexible access to digital texts while supporting evolving expectations around accessibility and user experience.

For libraries seeking authoritative research content, Torrossa Digital Library offers a rich and reliable source of quality and diverse scholarly content from across Europe and beyond, helping libraries support discovery, research and learning in one trusted environment.
